

# "S-BELT" SANITIZING CONVEYOR

## BENEFITS

- New design maximizes sand penetration and removal of extremely fine debris.
- Belt perforations, mounting tines underneath conveyor and eliminating retaining bars now reduce risk of residual sand removal.
- Elimination of residual sand reduces number of dumping cycles and bulk waste disposal costs.
- Simplified replacement of Stainless Steel tines: One bolt for each tine.
- Conveyor is easier to keep clean and clear of debris.

Available on all SURF RAKE® Models.
